AGOUTI (BLACK) COLOUR SCREENING TEST RESULTS

Name: EV MIA LITTLE LENA (AOPA)(REGO#:QPS-500)

AEGRC Tracking Number: AG5

The result of analysing DNA amplified from roots of the hair sample submitted as
EV MIA LITTLE LENA (AOPA) (QPS-500):

is consistent with the horse **CARRYING TWO COPIES** of the mutation that produces Agouti (black) colour

The homozygote (carrying two copies of the Agouti mutation) is usually solid black (base colour) in the absence of other coat colour modifying genes.

For more information contact the AEGRC
